**Catalyst Consulting Launches New Web Resource:
www.Consulting-That-Works.com**

WICHITA, KS – February 1, 2006 – Catalyst Consulting Partners LLC, a process improvement, organization development and strategic planning firm, today announced that it has launched a comprehensive new web site to be used by its existing and prospective clients, along with the general business population. This new web site, www.consulting-that-works.com, is dedicated to the premise that world class consulting services should be accessible and affordable for a broader range of organizations – and that consulting services should actually yield measurable improvements in client performance. In other words, Catalyst believes that professional services, such as consulting, should actually WORK.

“We have been working on perfecting this web site for many months,” said Glen Waisner, Catalyst’s co-founder and Managing Partner. “We wanted to provide a useful resource to the executives and managers we work with across the country, while offering high quality reference information for non-clients as well. This new web site also provides a web-based portal for our consulting associates throughout the U.S. to communicate and access client-specific data and resources.”

Catalyst’s existing web site, www.CatalystConsultingPartners.com, will automatically redirect visitors to the new, more comprehensive www.consulting-that-works.com.
